

INTERNATIONALLY CERTIFIED SECURE DESTRUCTION FOR STORAGE CLIENTS

(A FIRST IN SOUTH AFRICA BY METROFILE)

Metrofile clients can now elect to have boxes securely destroyed post storage requirements that comply with the toughest local and international standards. All companies operating within South Africa are required by law to maintain the confidentiality of company and customer information throughout their lifecycle, including the manner of disposal.

The introduction of the Protection of Personal Information Act serves as a reminder for all businesses to review current methods of disposal and seek compliance.

The secure destruction process is done by means of an end to end managed shredding solution undertaken by a proud subsidiary of Metrofile, Cleardata. Visit www.metrofile.com for more information on our full service offering.
